[Redacted]
The following is a translation of a Czech OSZ directive to agents stationed within Czechoslovakia:

"Among the resimmigrants from Volyn (Ukraine) and from Poland who are now settled along the border in Bohemia and Moravia, there is a whole row of individuals who do not agree with the policies of our government. They frequently reveal this negative position by spreading false reports of conditions in the USSR. Many of the Czechs from Poland served in the German Army and behave accordingly today - frequently converse in German, and it is possible that they have a connection with reactionary elements abroad.

"It was further ascertained that among the Volyn Czechs there are some Czechs who were formerly members of the Bandera bands who through misrepresentation got themselves assigned to emigrant transports and thus settled along the borders.

"Follow their activities closely in your sectors and report concrete facts and incidents."
